NOVEMBER 2025

PRESS INFORMATION

Wieland Electric and h.team at SPS 2025:

Working together for safe automation

When product expertise meets application expertise, real added value is created for practical use. This is precisely what the partnership between Wieland Electric and h.team from Calw will demonstrate at SPS – Smart Production Solutions 2025 – in Nuremberg. As a long-standing system partner for mechanical engineering and automation technology, h.team will be represented this year as a strong partner at the Wieland stand no. 440 in Hall 9.

Synergies for practical application

At their joint exhibition stand, both companies will demonstrate how mature products and practical application knowledge can be combined to create comprehensive solutions. h.team contributes its many years of experience as a system partner and perfectly complements Wieland's portfolio, from switch cabinet technology with pre-assembled terminal blocks and pre-printed strands to efficient power distribution with power supplies and energy bus systems to individual I/O systems and modern network technology.

There is a particular focus on machine safety, as h.team integrates Wieland's safety controls into customer-specific projects, thus ensuring reliable and standard-compliant solutions. The range is complemented by cable assembly and the manufacture of complete assemblies with tested connectors and components from Wieland Electric.

Long-standing partnership with substance

The collaboration between Wieland Electric and h.team is based on a long-standing, trusting partnership. Joint customer events have already been successfully implemented in the past, including the 2024 Expert Forum, which was very well received and offered practical insights into current topics

and developments relating to the new Machinery Directive. This close cooperation forms the basis for the joint presence at SPS 2025 and shows how partnership-based thinking leads to sustainable success. Joint events are also planned for the coming year, focusing primarily on practical and solution-oriented offerings, i.e. 'by practitioners for practitioners'.

Partnership that works

Under the motto 'driven by customer', h.team shows how cooperative partnerships lead to practical solutions that increase efficiency, enhance safety and simplify processes. Visitors to SPS 2025 can see this for themselves at the Wieland Electric stand and talk directly to experts from both companies.

ABOUT **WIELAND ELECTRIC**

Wieland Electric, founded in Bamberg in 1910, is the inventor of secure electrical connection technology. Today, the family-owned company is one of the leading suppliers of safety and automation technology and has been the global market leader in pluggable electrical installations for building technology for over 30 years.

Wieland Electric supports customers worldwide as a competent service partner and solution provider. This is made possible by around 1,700 employees and subsidiaries as well as sales organisations in over 70 countries. In addition to Wieland Electric GmbH, STOCKO Contact GmbH & Co. KG has been part of the Wieland Holding since 1998.

The company's core industries include mechanical engineering, wind power, intralogistics and HVAC, as well as building and lighting technology. The broad portfolio includes components, products and solutions for electrical installation, connection technology, power distribution, safety technology and switch cabinets. Wieland Electric also offers a comprehensive range of services and training programmes. With its cross-industry experience, wide variety of products and numerous service offerings, the company has consistently developed from a component supplier to a solution provider in recent years.
