

NOVEMBER 2025

PRESS INFORMATION

Wieland Electric at SPS 2025:

Concentrated expertise in safety and automation

Wieland Electric is a long-established family business based in Bamberg and, as the global market leader, is shaping the development of pluggable electrical installations. In line with this claim, Wieland is now also one of the leading suppliers in safety and automation technology. At the SPS – Smart Production Solutions 2025 trade fair in Nuremberg, the company is positioning itself as a reliable and innovative partner for key industries in mechanical and plant engineering. With practical solutions and a clear focus on efficiency, digitalisation and sustainability, the company specifically addresses the requirements of modern industrial applications. From 25 to 27 November, trade visitors will find a comprehensive portfolio for functional machine safety and mechanical and plant engineering in Hall 9, Stand 440, ranging from modern safety controllers and optoelectronic protective devices to safety services and high-performance terminal blocks.

Daniel Kast, Regional Sales Director DACH: 'In my new role as Sales Manager DACH at Wieland Electric, I look forward to welcoming you to SPS 2025. Meet our experts for functional machine safety live on site at

SPS 2025, for example in our expert lounge. Your questions will be answered by genuine experts and we look forward to many interesting discussions.'

Safe machines are not created by chance, but through forward planning, close partnerships and practical solutions. Wieland therefore pursues a systematic approach that goes far beyond individual components. From terminals and control systems to comprehensive services and tailor-made training courses, the company offers functional machine safety from a single source.

Hands-on solutions

The focus of the exhibition stand will be on the latest safety solutions, from smart engineering software to system components that interact in an interactive application. The new 'selos NEW GENERATION' terminal blocks will also be presented at the trade fair, offering impressive features such as matching accessories, digital planning support and high process reliability.

And samos® PRO MOTION, a controller that combines safety and motion functions in a single system. It is TÜV-certified, flexibly configurable and will be demonstrated live together with the samos® PLAN6 safety software. It features automatic hardware detection, intuitive drag-and-drop programming and TÜV-certified function blocks. In addition, long-standing partner h-team will be presenting its portfolio in the field of mechanical engineering and automation technology at the stand, offering trade visitors further practical insights.

Expert lounge

In the expert lounge, trade visitors will have the opportunity to talk to Wieland specialists about functional machine safety. In addition to practical presentations on current topics such as cybersecurity, the CE process and the new Machinery Directive, the lounge offers space for personal consultation and in-depth discussions.

Theory for practice

Another focus at the exhibition stand is Wieland's comprehensive service and training programme on functional machine safety, which goes far beyond the product portfolio. Interested visitors can gain insights into practice-oriented services and expertise relating to CE conformity and the requirements of the new Machinery Directive. Special attention will be paid to training courses, seminars and webinars that impart in-depth knowledge on topics such as CE marking and cybersecurity. In this way, Wieland supports its customers throughout the year in expanding their know-how in a targeted manner and optimally positioning themselves for future challenges.

Live insights at the SPS

All the product areas presented can be experienced live at the Wieland Electric stand in Hall 9, Stand 440. Trade visitors will gain an insight into the entire portfolio, from safety components and digital services to practical system solutions.

ABOUT WIELAND ELECTRIC

Wieland Electric, founded in Bamberg in 1910, is the inventor of secure electrical connection technology. Today, the family-owned company is one of the leading suppliers of safety and automation technology and has been the global market leader in pluggable electrical installations for building technology for over 30 years.

Wieland Electric supports customers worldwide as a competent service partner and solution provider. This is made possible by around 1,700 employees and subsidiaries as well as sales organisations in over 70 countries. In addition to Wieland Electric GmbH, STOCKO Contact GmbH & Co. KG has been part of the Wieland Holding since 1998.

The company's core industries include mechanical engineering, wind power, intralogistics and HVAC, as well as building and lighting technology. The broad portfolio includes components, products and solutions for electrical installation, connection technology, power distribution, safety technology and switch cabinets. Wieland Electric also offers a comprehensive range of services and training programmes. With its cross-industry experience, wide variety of products and numerous service offerings, the company has consistently developed from a component supplier to a solution provider in recent years.
