SUCCESS STORY

NEW COOPERATION WITH PAECH ELEKTRO

Berlin-based electrical company becomes new sales partner for Wieland products

PaechElektro, based in Berlin, is an innovative electrical company renowned for its dependability and commitment to sustainability. The company places significant emphasis on the advancement of electro-mobility through the installation of EV charging stations.

In its search for a suitable partner for implementing charging station infrastructure in underground garages, PaechElektro decided on the Podis® power bus system from Wieland Electric. The determining factor was the system's overall efficiency, flexibility, and ease of use. A high-IP flat cable and moveable tap-off modules make up the main components of the system. Thus, one power line can supply multiple charging stations. With the installation effort reduced, PaechElektro can electrify more garages more quickly. The short assembly time of the podis® system also increases the uptake of e-mobility by providing fast, secure, and flexible connections for charging stations. In addition, the small number of components of the podis® system makes it easy for electrical installers to plan and stock.

As an expert in the field of charging solutions for electric mobility, PaechElektro conducts training on charger installations. The company implements its projects in underground and multi-level parking garages. PaechElektro and Wieland Electric are contributing to the expansion of the charging infrastructure and uptake of e-mobility in Berlin by providing safe and efficient charging station installations.

Wieland Electric GmbH is thrilled to gain PaechElektro as a modern and reliable sales partner in Berlin.

ABOUT WIELAND ELECTRIC

Wieland Electric, founded in Bamberg in 1910, is the inventor of safe electrical connection technology. Today, the family-owned company is one of the leading suppliers of safety and automation technology and has been the global market leader in the field of pluggable electrical installations for building technology for over 30 years.

Wieland Electric assists customers with on-site support all over the world as a capable service partner and solution provider. This is possible thanks to around 1,600 employees and subsidiaries as well as sales organizations in over 70 countries. In addition to Wieland Electric GmbH, STOCKO Contact GmbH & Co. KG has belonged to Wieland Holding since 1998.

The company's core industries include mechanical engineering, wind power, intralogistics and HVAC, as well as building and lighting technology. The broad portfolio includes components, products, and solutions for electrical installation, connection technology, power distribution, safety technology, and the control cabinet. In addition, Wieland Electric offers an extensive service and training program. With cross-industry experience, a great product diversity and numerous service offerings, the company has consistently developed from a component supplier to a solution provider in recent years.
