JULY 2025

PRESS INFORMATION

Wieland Electric at HUSUM WIND 2025

Future-proof systems for wind energy – experience them live

From September 16 to 19, 2025, Wieland Electric will present its comprehensive portfolio of electrical engineering solutions for onshore and offshore wind turbines at HUSUM WIND. In Hall 2, Booth 2C06, visitors can learn about sophisticated system solutions for power distribution, lighting technology, and communications – live, in action, and firsthand.

Particular attention is paid to pluggable infrastructure systems for fast and error-free installation in the turbine, as well as retrofit-capable applications for existing systems. The portfolio is complemented by modern communication and control technology – robust, reliable, and prepared for demanding operating conditions.

Outdoor lighting also plays a role: Wieland showcases solutions characterized by durability and resilience in harsh environments. This ensures safe visibility even in critical areas such as transitions or platforms.

Plan wind energy efficiently – with Wieland Electric

Whether for new construction projects or retrofits, Wieland Electric's products and systems contribute to making wind turbines more efficient, safer, and future proof. As an experienced partner in the industry, the company focuses on practical solutions and sophisticated system technology – "Made in Germany."

Visit us in Husum—we look forward to a dialogue with you! More information: www.wieland-electric.com/husum-wind

ABOUT WIELAND ELECTRIC

Wieland Electric, founded in Bamberg in 1910, is the inventor of safe electrical connection technology. Today, the family-owned company is one of the leading suppliers of safety and automation technology and has been the global market leader in the field of pluggable electrical installations for building technology for over 30 years.

Wieland Electric supports customers worldwide as a competent service partner and solution provider. This is possible with around 1,700 employees and subsidiaries as well as sales organizations in over 70 countries. In addition to Wieland Electric GmbH, STOCKO Contact GmbH & Co. KG has been part of the Wieland holding since 1998.

The company's core industries include mechanical engineering, wind power, intralogistics and HVAC as well as building and lighting technology. The broad portfolio includes components, products and solutions for electrical installation, connection technology, energy distribution, security technology and control cabinets. Wieland Electric also offers an extensive service and training program. With cross-industry experience, a wide range of products and numerous service offerings, the company has consistently developed from a component provider to a solution provider in recent years.
