

RST® MINI

MOLA® DEVICE CONNECTOR

The innovative modular device connector with spring clamp technology – compatible with the trusted **RST®** MINI system.

This modular device connector has been optimized for luminaire manufacturers, but also works well in many other areas.

Thanks to the modular design, internal cable harnesses can be prefabricated at a separate location. In addition, the push-in terminal provides the possibility of wiring by automatic assembly machines.

This makes the installation of any application with the modular RST® MINI connector more flexible, quicker, and safer.

OPTIMIZED FOR LUMINAIRES

- + Minimal size with 20 mm connecting thread and optional twist protection.
- + Replaces an internal luminaire terminal
- + Suitable for through-wiring and point source luminaires

HIGHEST PROTECTION RATINGS

- + Protection rating IP66/68/69 stops water penetrating from outside
- + Additional internal water protection thanks to separate internal contact seal

EASY TO HANDLE

- + Suitable for automatic wiring
- + Equipped with a push-in spring
- + Separate prefabrication of device-internal cable harnesses possible
